

Master's/Doctoral Program in Life Science Innovation

T-LSI Special Seminar

Prof. Hiromitsu Nakauchi

(School of medicine, Stanford University/The Institute of Medical Science, The University of Tokyo)

Translating Stem Cell Research: Challenges at Front Line

Prof. Nakauchi is a world authority on the field of stem cell research. In this talk, he will introduce induced pluripotent stem cell (iPSC) technology-based projects aiming at clinical use.

November 5, 2020, Thu, 10:00-12:00 (estimated)

※Students, faculties and staffs outside T-LSI program are welcome to attend. The seminar will be given in English.

This seminar will be held on Zoom. Those who wish to join the special seminar should contact the following email address with (1) your name, (2) your email address, and (3) your affiliation (department, institute, etc) **by October 29th**. We will provide the detailed information to the above applicants several days before the seminar.
